

Patent Claims

1. Shower head arrangement,
 - 1.1 with a flat profile (1),
 - 1.2 with which the rear side (2) is formed for support on a wall surface,
 - 1.3 with a concealed fitting,
 - 1.4 which is located in the section on the rear side (2) of the profile (1),
 - 1.5 which is covered by the profile (1) and
 - 1.6 which can be activated from the front side of the profile, and
 - 1.7 with at least one shower head (8).
2. Shower head arrangement according to claim 1, with which the fittings may be fixed on the profile (1).
3. Shower head arrangement according to claim 1 or 2, with a concealed box (7) enclosing the fittings (20, 21, 22, 23).
4. Shower head arrangement according to claim 3, with which the concealed box (7) may be fixed on the profile (1).
5. Shower head arrangement according to one of the preceding claims, with which the side extension of the concealed box (7) and/or the concealed fittings (20, 21, 22, 23) is smaller than the width of the profile (1).
6. Shower head arrangement according to one of the preceding claims, with which the fittings (22, 23) partly extend into the profile (1).
7. Shower head arrangement according to one of the preceding claims, with a shower handset and a holding bracket for the latter that is connected by means of a hose (12).

8. Shower head arrangement according to claim 7, with which the water delivery to the shower handset passes through the interior of the profile (1) through a channel formed inside the profile and/or through a hose.
9. Shower head arrangement according to one of the preceding claims, with at least a side shower head (8).
10. Shower head arrangement according to one of the preceding claims, with several fittings which are concealed or if necessary are separately operable side shower heads (8).
11. Shower head arrangement according to one of the preceding claims, with clamped-joint connections for the hydraulic connection of the piping of the profile with the fittings.
12. Shower head arrangement according to one of the preceding claims, with a fitting connected with the profile, which can connect clamped-joint connections with the house installation.
